LAKEWOOD CO 80228

Dear Mr. Lehto,

On April 11, 2002, a surface compliance inspection was conducted at the site of your mining notice, UTU-070646, located in T.14 S., R.10 W., Section 7. The inspection revealed no problems; however, we have also been made aware that you have taken over two other operations in the area from Mike and Sandra Sprunger. New surface compliance regulations that went into effect on January 20, 2001 mandate that the operators of all mining operations conducted under the mining law that exceed casual use must submit a financial guarantee for reclamation by January 20, 2003. It may be to your benefit to submit a Plan of Operations (Plan) that includes all three sites and submit a bond that would be adequate to reclaim all three sites at once, rather than to calculate the cost for each site separately, which would require that you include costs to mobilize and demobilize equipment to the area three times.

We are enclosing the requirements for a Plan and reclamation cost estimates. If you choose to submit a Plan, please do so as soon as possible, so there is ample time to complete the approval process before the January 2003 deadline.

If you have any questions, please feel free to contact me at (435) 743-3125.

Sincerely,

Jerry Mansfield
Geologist
